

Mixed-document transfer: native token model versus EditLens windows

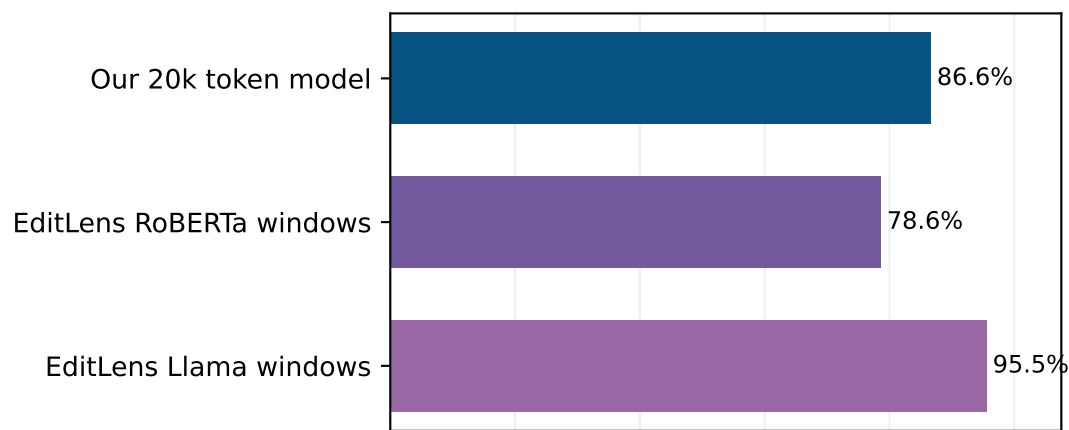

LLMTrace mixed: AI token recall

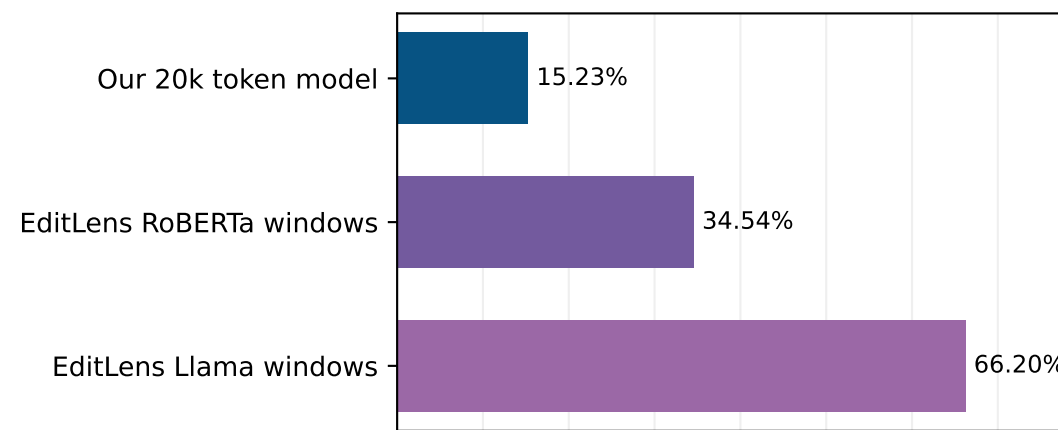

LLMTrace mixed: human token FPR

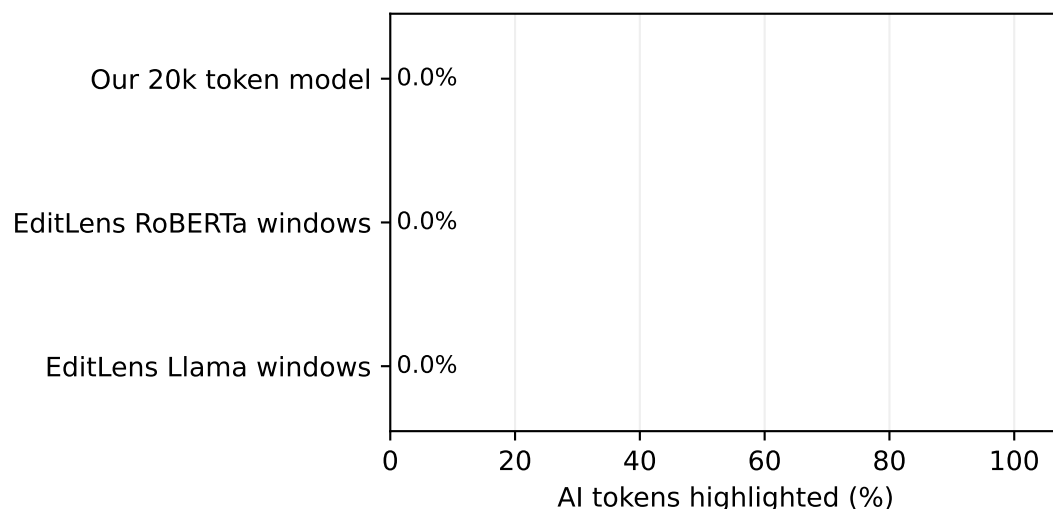

AITDNA mixed: AI token recall

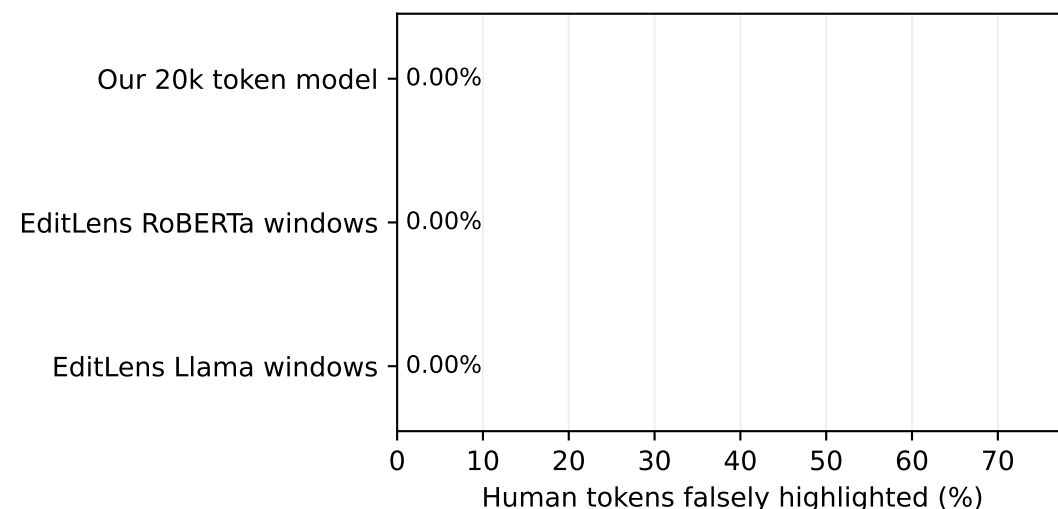

AITDNA mixed: human token FPR

CoAuthor mixed: AI token recall

CoAuthor mixed: human token FPR

EditLens window scores are broadcast across each window; these are coarse spans, not native EditLens token predictions.
Our 20k model trained on other LLMTrace records. All thresholds use the separate human calibration set.
